OV Chip Guide

The OV-chipkaart (OV-chip card) is the national public transport ticket system in Netherlands and has replaced paper tickets. The OV-chip card is in use on all forms of public transport including trains, trams, buses and metros.

What ticket do I need?

- We advise to choose a single use OV-chip card since this is more convenient to use than an anonymous OV chip card. The anonymous OV chip card is advisable when you are certain to travel more often during your stay in the Netherlands. Single use tickets can be bought from the machines at the station or at the service desk of the NS.

How to buy a single use OV chip card?

The following steps will guide you through the process of buying the anonymous OV-chip card:

1.

This is the main screen of the NS ticket machine. To proceed please press change the language to English on the bottom left of the screen and press "buy single ticket or OV-chip card".

2.

Press buy Single tickets and follow the instructions.

Travelling with the intercity-direct

When you would like to take the fast direct train to Rotterdam from Schiphol (intercity direct) you need a supplement before entering the train. These supplements can be bought by checking in with your OV chip card at the **Red** check-in points on the platform (5-6 on Schiphol), at the machines as a single ticket or at the service desk of NS.

Travel times comparison:

13:39 → 14:05	0:26	0	€ 11,60	→
Intercity direct				
13:46 → 14:38	0:52	0	€ 11,60	→
NS				

Intercity direct ~ 26 minutes

Intercity direct ~ 52 minutes

The supplement can only be used once and does not need to be checked out

1. Check-in at the nearest check-in point.
2. **Do not forget to add the supplement afterwards at the **RED** check in points on the platform.**
3. **When you are at your destination please do not forget to check-out.**
